GSatTrack

Iridium 9575

The Next Generation of SatPhones

The Iridium 9575 stands alone as the premiere choice for satellite phone users. It has a more rugged design, is 10% thinner and 7% lighter than the current long term model the Iridium 9555.

With the addition of a tracking function and panic button, these new features are capable of enchancing the GSatTrack user experience.

Personal GPS Tracking & Panic Button

The Iridium 9575 combined with GSatTrack adds an additional layer of security to any person in possession of one of these devices. You can locate the person carrying the 9575 from any web enabled computer, it's as simple as logging in and locating.

The Iridium 9575 comes with a small button that can be pressed in the event of an emergency. If you become lost or fear for your life in a bad situation, pressing this button will activate the transmitter on your GPS satellite tracking device. It will immediately begin transmitting a signal that includes your latitude and longitude. Help will be able to easily track you down within a short period of time.

NEW! Panic Button

The Iridium 9575 comes equipped with a built in panic button for emergency situations.
